ONLY ONE FLAG. of Chicago. Schwab and Most have flaunted it many times in New York. The red flag was displayed in Milwaukee, and made a rallying standard for the violators of law and the assailants of order and the peace of society. The red flag was found cheek by jowl with dynamite bombs in the office of the Socialist journal of Chicago, on Tuesday. The red flag is a menace to free institutions; it is the emblem of anarchy and blood; it is synono mous in spirit with conspiracy against the rights of freemen, and with secret murder: it typifies vicious and abhorrent doctrines. It ought to be an offense to have it in posses sion, a crime to display it, and the flaunting of it should be deserving of death The time has come when it should be outlawed and its bearers shot on the spot-The country is too free where it is tolererated. Liberty is outraged, the banner of freedom is insulted, and self-government assailed whenever it is uplifted. The American people have altogether too long permitted the red-handed Anarchists to plot against the Republic, and the guarantees to its sons. The Chinaman is a menace to our civilization; we do not want him in the country; he has no right place here; his methods tend to degrade labor; his sytem is antagonistic to ours in all Post. things. But he at least does not parade our streets with the red flag and pike; he does not murder the officers of the law and proclaim the act a virtue, nor shout rebellious doctrines upon the highways. He is a thousand times preferable to the German and French Anarchists and all Socialists. Dangerous as he is elements of the country, he is as harmless as a dove compared to the ravening foreign outlaws who swarm to this refuge of the oppressed, for what appears to be the sole purpose of putting the knife to the temporized with the assassin crowd too long; too long permitted these social conspirators to trample the emblem of the republic. The restriction of immigration needs to be extended to all who swear allegiance to the red flag or the vicious doctrines it represents. Louise Michel, Most, Schwab, Parsons, Spies and their ilk must be deremedies: when found in arms or force against the due authority, shoot them society, try them according to the laws broad when they shield those who stab it beneath its protecting arm. when Socialist scum is in front, else we mistake the entire history of the volunteer forces of the country. There should be no more temporizing. It is folly to wait until the bombs are thrown; the order will come to hunt the enemies of free institutions as wild animals-shoot them on sight.

THE honest workingmen of America we it to themselves and their country to put the seal of their hot indignation upon the espousal of their cause by the Anarchists. They are so far from being their friends that the advocacy of labor interests, into which they have projected themselves. has already seriously prejudiced the public mind against the workers. These latter should, without hesitation, and in every

city in the land, and in terms clear and tion in the House of Commons to reject unmistakable, echo the expression of Mr. Gladstone's home rule bill on its second Powderly, "The Anarchist idea is ununmistakable, echo the expression of Mr. American and has no business in this country." We are by no means alarmists; we have unwavering faith in the national heart, and perfect confidence in the ability of this people to maintain the integrity of the laws, and in their loyalty to them. But they are dull students of history who have not learned that republics cannot

Do the citizens of Sacramento think it ossible that a procession for any purpose could move through our streets with the red flag of the anarchists afloat and the stars and stripes furled? Yet that has happened in the cities of the East. We do not believe it possible in California without bloodshed then and there.

### The California and Oregon.

ournal has called renewed attention to the ceed for the completion of the California and Oregon Railroad. It is both a com-mercial and a military necessity. This coast should be one, but at present it is separated by the gap between our railroad system and that of our northern neighbor. People on this side of the State line com-San Francisco; on the other side they go to Portland. Instead of the healthy unrestrained circulation that should be going on throughout the slope, there are two cramped local circulations, and a liga-The correspondent recently examined the territory through which the road is to

run, and he expresses the opinion that if it had transportation facilities it would sup port three million people. At present there are not 200 inhabitants in the whole region It is practically inaccessible, and nobody cares to settle there. The land is occupied by cattle kings, who would have to give way to small farmers if the country was once connected with the outside world. The objection of land monopoly in connection with the railroad grant is thus still more valid against the present state of affairs. San Francisco is vitally interested in the completion of this road. The Eastern immigrants who have poured in here of late are used to cheap land. Many of them are frightened off by the high prices which are justly asked for favore in the control of the control justly asked for farms in southern Califor-nia. The thirty million acres which the empletion of the California and Oregon would make available for settlement would every family settled there would be tribu tary to San Francisco. And when such an opportunity is furnished, perhaps our merchants will make some effort to recover their lost Oregon trade. Portland ought to be tributary to us, instead of to St. Paul or Chicago. The railroad may make it so. The California Legislature, the San Francisco Chamber of Commerce, the Sacramento Board of Trade and citizens gen erally throughout the State have petitioned Congress for the confirmation of the land grant, without which the road will not be built. A report favoring the forfeiture of the grant has been made by a House compractically unanimous against such a elas. Gout, Chronic Sores, Syphilis course, and our delegation should made re newed efforts to prevent it.

### LOCAL INTELLIGENCE.

Letter From Dr. G. B. Clow. The following letter was yesterday addressed to the Board of Trustees from Dr. Clow, who now constitutes the City Board vegetables; the hotels, restation we raise or

of Health:

SACRAMENTO, May 6, 1886.

To the Honorable Board of City Trustees—GENber of an honorable profession, to state, in reply
to a letter of W. R. Cluness, published in yesterday's Bee and to-day's Record-Union, that I,
too, fully appreciate the honor conferred upon
me in being made a member of the City Board
of Health. I regard it as a still greater honor
owing to the fact of not having been solicited
by the appointing power to vote for any particular candidate for the position of Health Officer,
and, unlike Dr. Cluness, I have not consented
to remain on the Board in the interest of any
special person for the salaried position to be
filled by the Board.

Dr. Cluness has not been complimentary in
his terms concerning me, and in his eulogistic
encomiums with reference to Mr. Ferral has not
been flattering to his associates on the old
Board. I had been under the impression that
the efficiency of a Health Officer depended
somewhat upon the intelligence and comprehensiveness of the Board of Health, but am led
to infer from Dr. Cluness' letter that all the
sanitary improvements put into execution during the last three years have been due to the
"superior capacity and tact" of the Health
Officer more than to the ability of the members
of the Board under whyse direction he serves.
I can only wonder why we should have a Board
of Health at all while we can procure such
"superior capacity and tact" outside of the
medical profession.

I regret having incurred the bad opinion of
Dr. Cluness without a word having passed be-

medical profession.

I regret having incurred the bad opinion of Dr. Cluness without a word having passed between us, but am gratified with the fact that all the gentleman thinks he knows to my discredit is hearsay and not founded upon any personal knowledge. I am charged with persistently violating professional ethics. To this charge I will state that I am a regular graduate in medicine, and am eligible to become a member of the local and State medical societies, but as such membership is not compulsory, I have not done so. I have served as physician to the Foresters, a benevolent society in this city, for a specified remuneration, something prohibited by a rule of the local society, but allowed in Oakland and San Francisco. For this I am called unprofessional and receive the condemnation of Dr. Cluness and some others. This is the extent of my offending.

Thanking you for the honor which you have conferred upon me, and which I hereby accept, I remain your very obedient servant, G. B. Clow, M. D.

The River Fruit Crop.

The River Fruit Crop.

Captain Albert Foster returned yesterday morning from a trip down the Sacramento as far as Rio Vista, made for the purpose of finding out what the fruit prospects are along the river. His observations convinced him that, while the yield will not vinced him that, while the yield will not be quite as poor as has been stated—quarter of the usual crop—it wiil not amount to half of a crop. In some places the proshalf of a crop. pects are very slim for peaches, especially on old trees; but in other localities Chinamen were observed thinning the fruit from the branches. The apricots will be as scarce or scarcer than the peaches. The farmers think the trees budded so early that a light frost which followed ruined prospects. Pear trees looked well for a while, but a blight of some sort set in, and caused the fruit to drop off. To BEAR IN MIND THAT ONE BENSON'S
Capcine Fiaster is worth a dozen of any other porous plaster. Benson's plasters are a genuine medicinal article indorsed and used by the medical profession from Maine to California. They cure in a few hours ailments which no others will even relieve. Cheap and worthless imitations are sold by dealers who care more for large profits on trash than they do for the sweets of an approving conscience. Beware of them and of the "Capucin," "Capsicin," and "Capsicin" plasters which they sell to the unwary. These names are nothing but misleading variations on the name "Capcine." Note the difference, go to reputable druggists and you will not be deceived. The genuine Benson's has the "Three Seals" trademark and the word "Cancine" cut in the center,
